U.S. Engineered & Manufactured Solutions Since 1952!

Storch has engineered and manufactured a complete line of material handling equipment for the Metal Stamping industry since 1952. For over 58 years our product offering has evolved into a full line of products, both Magnetic and Non-Magnetic making Storch a true one stop shop. Storch's full line of material handling & magnetic products uniquely allows our technical sales staff to suggest and engineer un-biased solutions for your specific application.

STEEL-HINGE BELT CONVEYORS

Storch offers complimenting hinged steel belt conveyors. Storch Steel Hinge Belt Conveyors (SHBC Series) are designed with 1-1/2", 2-1/2" pitch, top quality steel hinge belting. Varying belt sizes are required for different conveyor applications and environments. The Steel Belt conveyor is a viable option which selected for the proper application. The Storch SBC is designed and built to outlast our competition by utilizing oversized belting, rollers and frame. Call to schedule an in plant demonstration to see the difference first hand. 4", 6" and 9" pitch is also available upon request.

MAGNETIC SLIDE CONVEYORS

Storch's Beltless Magnetic Slide Conveyors (BMSC Series) are engineered for years of maintenance free operation. No external moving parts makes the BMSC series the safest conveyor available on the market today. The BMC series will convey hot, cold, wet, oily and dry ferrous materials virtually anywhere trouble-free transfer of product is required. Magnetic conveyors can be designed and built with powerful ceramic and rare earth magnets. These units are ideal for scrap such as punch-outs, stamping scrap, fasteners, trim stock and chips. Request your copy of our 30 detailed benefits today.

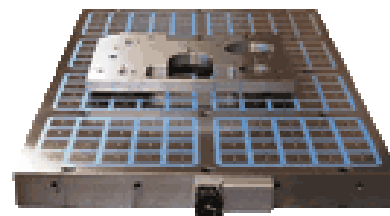

SCRAP SHAKERS - HEAVY AND LIGHT DUTY

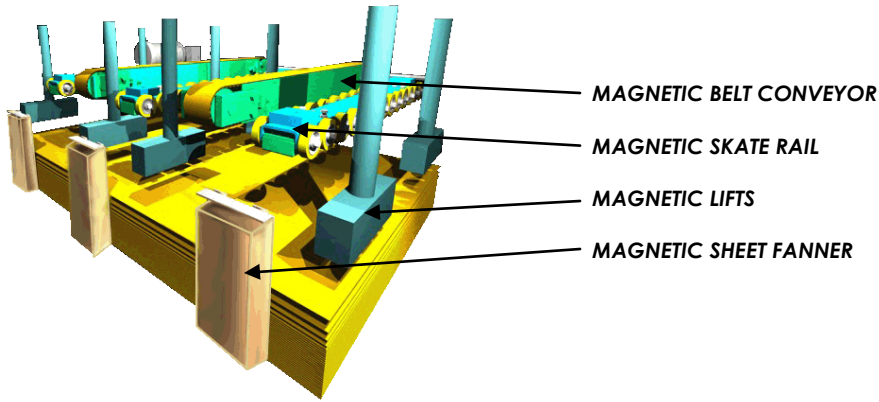

The Storch (AT Series) air transporter models are designed for moving scrap, parts, and sorting/screening product applications. Storch's AT conveyors are designed around a high quality low maintenance module that holds a tray or trays per the required application. Storch's AT use a low volume of compressed air at low PSI rather than dangerous 110 volt power where wet and sharp steel/scrap environments can cause hazardous situations. Models range from palm size to 1500 lb push force. Ask about Storch's complete line of **AIR FEEDERS** for feeding coil or round stock— Coming Fall

MAGNETIC DIE CLAMPING

Permanent Magnetic Die Holders (PMDH Series) were originally designed for work holding in machining centers. Storch will offer Rare Earth— Neo Permanent Magnetic Die Holders for your stamping press in the Fall of 2009. These new state of the art permanent magnetic die holders are failsafe, meaning that electric power is only used to turn them off, saving you money on electricity during operation. Easy push button operation will release tools. Rated at 150 ton / m² of magnetic holding, generating huge holding forces on even modest-sized dies. Square pole configuration means clamping is equally high in every direction. Contact the Storch Factory for more information.

MAGNETIC BELT CONVEYORS, SKATE RAILS, LIFTS, SHEET FANNERS

Our magnetic sheet handling equipment is extremely efficient and productive, making your operations more profitable. We can design a solution for you, or you can build your own, from a single magnetic sheet fanner to a completed integrated system. Storch's sheet handling products: Improve vertical and lateral transfer, minimize production downtime, improve operator safety, reduce labor expenses, and potential employee injuries from handling sharp steel.

MAGNETIC SWEEPERS

Make a Clean Sweep of dangerous metal hazards with Storch Magnetics diverse line of magnetic sweepers! Our sweepers can be designed to meet all your needs, whether they are simple clean ups around a work areas, machines, or maintaining large areas including exterior grounds, work sites, streets, schools, runways and more. Storch Magnetics provides quality sweepers for light to heavy duty jobs

LIFT - HOLD - AUTOMATE

Storch is an original manufacturer of insulated multi-pole assemblies multiplying strength & service life in industrial applications. We provide a complete line of dependable, economical magnets in a variety of shapes and sizes produced to meet your Magnet specifications. Small yet powerful, Storch Magnetic Assemblies can solve numerous holding challenges with simple use efficiency and zero operating costs. PERMANET ELECTROMAGNETS PNEUMATIC end of arm Mag Lifts

LASER CUTTING AND FORMING SERVICES

In addition to Magnetics, Storch offers CNC Laser Cutting, Forming & Precision Sheet Metal Fabrication services. We manufacture fabricated products & equipment to customer supplied drawings, and provide light R&D, Engineering, and Application Assistance in designing and manufacturing Sheet Metal Prototype, Standard Metal Work or Custom Sheet Metal Fabrications to suit.

At STORCH we believe in building long-term relationships with our customers and standing behind our products. Today our complete product offering, sales and support has earned us "Preferred Vendor" status among our customers. Storch's long-term customers see the Storch advantage - superior Quality, longevity and reduced down time for maintenance through excellence in design and US manufacturing.
