

“SMART FACTORY 4.0” POWER LUNCH

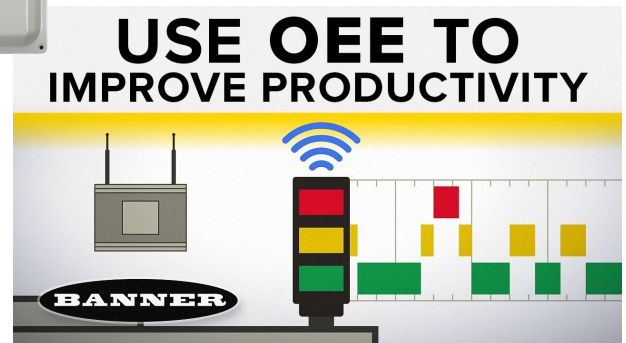

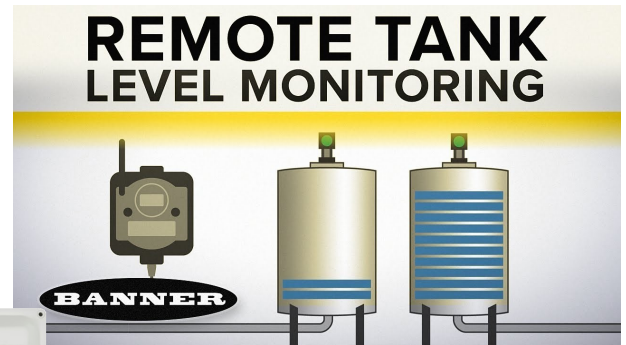

June 19th, 2019 from 10:30am—Noon with **FREE** lunch at Noon

9267 Riley St Zeeland MI 49464

Register by emailing your information to Sales@industrialcontrol.com

** Seating is limited to first 40 customers **

Maximizing efficiencies within manufacturing has never been easier. Thanks to wireless technologies from Banner tracking the temperature and vibration of every critical motor in your plant, monitoring tank levels, replenishing inventory, and increased productivity are all elements we can track in real time. Manufacturers are going way beyond standard practices in Continuous Improvement (CI) as they seek to improve their industrial operations. Join us for the Smart Factory 4.0 Power Lunch and arm your company for the future.

The ability to receive preventative maintenance alerts in real time from the cloud before the motor fails is invaluable. How much revenue will your business lose when production stands still? Industry 4.0 is happening right NOW and maintaining a competitive advantage is vital to the future success of your company.

What you will learn:

- What 4.0 Leaders are doing differently to achieve transformative outcomes.
- How 4.0 drives digital transformation.
- The global state of 4.0 programs.
- Which organization structures and budget constraints emerge among 4.0 programs.
- What technology choices 4.0 leaders make.
- Why legacy (antiquated) manufacturing systems and business systems impact 4.0 programs.
- Five best practices for a successful 4.0 program.

The time is now to adapt Industry Leading 4.0 Technologies. Register today by emailing us at Sales@industrialcontrol.com and prepare yourself for the future!
